

Glenbriar and Peartree Relocate to Waterloo

WATERLOO, ON, **April 18, 2006** — Glenbriar Technologies Inc. (CNQ: GBRT) is pleased to announce the relocation of the Eastern Division of Glenbriar Technologies and Peartree Software to 550 Parkside Drive, Unit 8A, Waterloo, ON N2L 5V4 effective immediately. All phone numbers remain the same.

This move was a strategic decision to better serve our customer base by providing easy access to our new location via Highway 85 off Northfield Drive. The ground level office space allows the IT technicians quick access to their vehicles when commuting to customer sites and transporting hardware.

550 Parkside Drive is located in a professional business plaza, providing ample free parking for staff and visitors, as well as deliveries at the rear of the building. Custom configuration of the new premises has resulted in improved communication flow, better space utilization, and a significant reduction of overall office space requirements. The new space includes an attractive training room for customers, a boardroom, meeting room, a state of the art server room with a fiber optic connection, as well as attractive amenities for our staff, including a kitchen, dining area and lounge.

David Moser, President of Peartree Software and Vice-President of Glenbriar Technologies, Eastern Division affirmed that, "The move from Kitchener to Waterloo is a positive step for our companies. As business needs change, it is important to alter the way you do business in order to meet the needs of your customers and employees. We are now able to provide more convenient access to our customers for demos, training and support from Waterloo, the heart of Canada's leading high technology area."

About Peartree & Glenbriar
